**DETAILED ACTION**

1. Applicant's amendment and accompanying remarks filed November 21, 2008 are acknowledged.
2. Examiner acknowledges amended claims 1 and 24.
3. Examiner acknowledges cancelled claims 3-4, 6-7, 9, 12, 22-23, 26-27 and 32.
4. Examiner acknowledges withdrawn claims 15-21.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-2, 5, 8, 10-11, 13-14, 24-25 and 29-31 are rejected under 35 U.S.C. 102(e) as being anticipated by So et al., U.S. Pre Grant Publication 2005/0064234.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

So discloses an emissive layer of an organic light emitting device comprising a polymer. The reference also discloses in paragraph 0015 that the end groups of the polymer are charge traps. the claims of the reference disclose that the polymer chain in the emissive layer has at least one first monomer and at least one second monomer with the first monomer providing high electron mobility and the second monomer providing high hole mobility. Reference claim 5 discloses that the end groups of the polymer traps either electrons, holes or both. Additionally, paragraph 0015 of the reference discloses that the energy barrier to trap electrons is at least 0.1 eV (a difference between a LUMO level of the end group and a LUMO level of the portion of the polymer chain). In paragraph 0016, it is disclosed that the energy barrier to trap holes is 0.1 eV (a difference between a HOMO level of the end group and a HOMO level of the portion of the polymer chain).

### ***Response to Arguments***

7. Applicant's arguments filed November 21, 2008 have been fully considered but they are not persuasive. Applicant argues that So does not teach or suggest the host component is mixed with at least one of a hole trap or electron trap. Applicant has amended claims 1 and 24 to recite the host component is mixed with at least one of hole traps or electron traps. Applicant provides support for the amendment in the present specification on page 3. It is disclosed in page 3 of the present specification that an electron trap can be chemically bonded to the polymer. So discloses an emissive polymer used in an organic light emitting device has end groups that are charge traps. The rejection is maintained.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
